Apple Sorry for Slowing iPhones, Cuts Battery Price by \$50
2023/06/29

Apple is apologizing for secretly slowing down older iPhones, which it says was necessary to avoid unexpected shutdowns related to battery fatigue. Many customers had interpreted the move as a way to juice demand for newer models. Apple also says it will cut the price of a battery replacement by \$50 to \$29. It previously cost \$79 for those who didn't purchase the Apple Care maintenance plan. The replacement plan begins in late January for anyone with an iPhone 6 or later that requires a new battery. Apple will issue an update to its operating system early next year to give users a better understanding of the health of their battery. Hostile customer reaction was swift after a report this month uncovered the intentional slowdown in speed tests.
